NED Science Forum and BANT AGM 13 May at RSM London.

Hello there,

Don't miss out! Tickets for the [NED Science Forum](#) and the [BANT AGM](#) on 13 May are [on sale](#). The NED Science Forum is open to BANT members and others in the healthcare community, making it a great opportunity to build your network. BANT members can [secure tickets](#) at the special membership price of £45. A great investment in order to hear from industry leaders, network with your peers and event sponsors, and debate the art and science of nutritional therapy. The BANT AGM is free for all members. Don't be fooled by the title – this event pops with information! Yes, we need to cover the statutory requirements for an AGM but it is much more than that. Nutrition is jumping right now so come to both parts of the day on 13 May at the Royal Society of Medicine and share a bowl lunch and a polyphenol-rich beverage at the gala evening. We look forward to seeing you there.

You may have noticed that you now have access to 2 drug-herb-nutrient interaction databases through your BANT membership. BANT has recently become the first UK-based organisation to secure access to EfficaSafe, a new interaction database that offers fantastic functionality for you to use in clinic. Read more about it [here](#) and see below for access to the recording of the webinar we recently hosted live with EfficaSafe. Access the platform from your BANT dashboard by clicking the hotlink 'Evidence Databases' or directly from the [Science and Education landing page](#).

BANT has got a full programme of events and webinars planned for you. Check out the starting list below. Our training providers are also busy. Read on for the full run down.

Pure Encapsulations

Symptoms of anxiety, depression and insomnia are associated with changes in central and autonomic nervous system activity as well as dysfunction of the vagus nerve. Importantly, measurement of these changes can predict the development and severity of symptoms, guide management, and track treatment responses.

This seminar explores the use of clinical assessments, including non-invasive testing and wearable devices, that reflect vagus nerve and nervous system function, to help guide nutritional and

lifestyle medicine-based interventions. We also review wider considerations in the nutritional management of anxiety, depression and sleep disorders.
